The pioneering technology in accommodation mapping

Juniper Vervotech

Juniper Travel Technology, a leading provider of technology solutions for the travel industry, with more than 450 customers, creates a new vertical that sets global standards for accommodation mapping.

Juniper Booking Engine and **Vervotech Mappings** technology offer a platform that optimizes accommodation information, providing your customers with a reliable and enriching experience when searching for accommodation options on your website.

The solution **maps accommodation inventory** with the latest and most advanced **Artificial Intelligence (AI)**-based technology to improve accommodation management and reduce booking errors.

Juniper Booking Engine

The most **complete, customizable, robust**, and **configurable** modular Booking Engine for Receptive Agencies (DMC), Travel Agencies (OTA), Bed Banks, Airlines, Wholesale Tour Operators, and Cruise Lines.

We work with **over 450 Clients** who already trust us, and you can offer your tourism inventory to them.

The platform allows you to connect globally through **more than 500 XML connections**. Additionally, the solution has a global network of **over 1500 potential buyers** already connected and ready to buy from you.

Boosting the **quality of accommodation data** in the **travel industry**

Hotel Mapping

The The best way to eliminate duplicate hotel inventory from multiple suppliers you work with.

Combine **Juniper Booking Engine's Unique Hotel module** with **Vervotech's Hotel Mapping** to display **duplicate-free hotel results** prioritized by price or supplier on your website, leveraging artificial intelligence and machine learning to ensure high quality content with **99.999% accuracy**.

 Daily content updates in real time.

 Proper mapping of hotel attributes such as images, geo-codes and room details.

 Self-management portal for feedback on the quality of content from suppliers.

 Seamless integration with your platform.

Room Mapping

The The leading room data mapping tool.

The platform combines the **Room Mapping** technology of **Juniper Booking Engine** and **Vervotech** to **standardize room data**, offering all combinations and regimes **without duplicates**, providing customers with detailed information **to make smarter booking decisions**.

 Increase the overall accuracy of room groups/references displayed on your platform.

 Quickly fills in missing or incorrect room information.

 Integration of the API into your current platform is extremely simple, allowing you to get going in a matter of days.

 Enhances conversions and maximises profits.

Hotel Curated Content

The most accurate way to provide illustrative and descriptive hotel content.

The solution is designed with **artificial intelligence** models specialized in **removing duplicates and providing illustrative and descriptive content** from multiple accommodation providers.

 Opinion-based content to define property attributes such as hotel name, star rating, address, geo-code, property type, etc.

 Provides your customers with the most up-to-date property listings and hotel rebranding.

 Map alternative accommodations as easily and efficiently as regular ones.
